

Standard Measurement to Supervise Key Goods with a Total of 205 Items and 20 Services

Sensitive List (SL)

For special sensitive goods and services, monitoring prices and conditions either in domestic and overseas are done by assigned authority of the inspecting and operating division on sale prices strictly and continuously in Bangkok and nearby provinces. If crisis occurs, may set up further measurement as follow:

1. Set up a further list of controlling goods and price services
2. Strictly Control sale prices
3. Set up a allocate of goods
4. Supply goods which are necessary for life and set distributing system management for people's needs.

Priority Watch List

The condition of goods is monitored closely 2 times a week by the authorities of the inspection and operation division to inspect sale prices and if crisis occurs, may set up further measurement as follow:

1. Co-ordinate the retailers to meet the manufacturers & suppliers directly
2. Manage the systems for manufacturing & distributing of goods including for the goods related to these factors
3. Prevent the hoard.

Watch List

In normal condition, the standard measurement has been set up to supervise as follow:

1. Monitor price condition and quality of goods and services every 15 days including inspecting & supervising to prevent of taking advantages against the consumers by the inspecting & operating division.
2. Provide hotline number 1569 on 24 hours for the purpose of listening to complaints from consumers.
